## WORK EXPERIENCE

---

**Brick, Jakarta, Indonesia (remote) / Software Engineer (Front End Web)** 09/2023 - 07/2024

- Developed and maintained features in Brick Dashboard and other projects using React, REST API, Material UI.
- Implemented JavaScript Obfuscation and AES256-GCM encryption. This initiative significantly bolstered web security from the client side, setting a new standard in data protection.
- Led the sunseting process for products on Brick Dashboard.
- Increased unit test coverage from 0% to 80%.

**Kargo Technologies, Jakarta, Indonesia (hybrid) / Software Engineer (Front End Web and Mobile)** 05/2022 - 09/2023

- Developed features for web and mobile apps using React, GraphQL, and Kotlin.
- Enhanced first-mile shipments efficiency by 50% through D-App.
- Successfully refactored and revitalized the invoice feature on NFT only in one sprint and increased web performance on the invoice feature from 5 seconds to 2 seconds.
- Increased unit test coverage for NFT from 5% to 30%.

**Xapiens, Yogyakarta, Indonesia (on-site) / Software Engineer (Front End Web)** 02/2021 - 04/2022

- Developed XSwift using React, reaching over 300,000 visits in a year.
- Regularly deployed web apps to Rancher.
- Increased unit test coverage from 0% to 80%.

**Gamatechno, Yogyakarta, Indonesia (on-site) / IT Associate Consultant** 12/2019 - 06/2020

- Assisted in creating master plans and blueprints for e-Government projects.
- Helped the marketing team with budget plans and online marketing.

## EDUCATION

---

**M.Eng. Information Technology / Universitas Gadjah Mada** 01/2017 - 10/2019

**B.Eng. Electrical Engineering / Universitas Gadjah Mada** 08/2009 - 08/2016

## PROJECTS

---

- **Todos:** Another todos app. But wait, this is different, because it demonstrates that I'm capable of being a full-stack developer using Javascript all the way! (Next.js and Express). You may check the app [here](#).
- **HireFazz:** Fullstack web app for a platform that uses AI to streamline the hiring process by automating repetitive tasks like CV screening and job matching. I've built both the landing page [here](#) and the app [here](#).
- **Beach Resort:** Fullstack web app for resort booking. [Link](#)
- **Wedding Websites:** Developed multiple wedding websites using Next.js and MongoDB. [Examples](#)
- **Vue Pokémon:** Front end web app for Pokémon management. [Link](#)
- **Personal Portfolio:** Built a single-page portfolio using Next.js and Tailwind. [Link](#)

## SKILLS

---

- **Languages:** JavaScript, TypeScript, HTML, CSS, Kotlin, SQL.
- **Tools:** React, Redux, Next.js, Express.js, CRA, GraphQL, REST API, Vercel, Netlify, GitHub, Android Studio, Figma, Jest, React Testing Library, Enzyme, Webpack, ESLint, Storybook, Vite.
- **Systems:** PostgreSQL, MySQL, Render, Supabase, Prisma, Firebase, Azure, Material-UI, Ant Design, Tailwind CSS, Styled-components, Emotion.js, Contentful API.
- **Roles:** Full-stack Developer, Front End Developer, Mobile Developer, IT Associate Consultant.
