https://github.com/farisadlin

Faris has always been passionate about the IT world, and his love for programming led him to pursue a career as a software engineer. What's impressive about Faris is that he's a self-taught programmer who has honed his skills through hard work and determination. With his experience in developing android apps and web projects using a variety of tools such as React.JS, Next.JS, Node.JS, GraphQL, Gatsby.JS, Strapi.JS, Wordpress, and etc, Faris has proved to be a versatile and highly-skilled programmer.

In his career, Faris has worked in a range of exciting roles, including social media analyst at Kampung Creative and IT consultant at PT Gamatechno. He's also contributed his expertise as a software engineer at Xapiens Teknologi and currently works at Kargo Technologies.

While Faris loves his job at Kargo Technologies, he's always on the lookout for new challenges and opportunities to learn and grow. His passion for the IT world drives him to keep pushing himself and his company towards greater success. With his wealth of experience and knowledge, Faris is sure to make a significant impact in the industry for years to come.

EDUCATION

MASTER OF ENGINEERING (M. ENG), INFORMATION TECHNOLOGY
JANUARY 2017 - OCTOBER 2019

Universitas Gadjah Mada (Yogyakarta, Indonesia), 3.54 GPA

- Have a journal published on International Conference on Electronics Representation and Algorithm (ICERA 2019): Current Trend and Literature on Electronic CRM Adoption Review.
- Master Graduate Thesis: Chatbot Implementation in E-Commerce Based on Intent.

BACHELOR OF ENGINEERING (S.T), ELECTRICAL ENGINEERING
AUGUST 2009 - AUGUST 2016

Universitas Gadjah Mada (Yogyakarta, Indonesia), 2.56 GPA

- Undergraduate Thesis: Effect of Impulse Voltage Front Time on Arrester.

EXPERIENCES

SOFTWARE ENGINEER - KARGO TECHNOLOGIES / PT. PANTHERA BIRU INDONESIA (JAKARTA, INDONESIA)
MAY 2022 - NOW

- Developed and maintained groundbreaking features across multiple repositories, including NFT (Nexus for Transporter), NFS (Nexus for Shipper), TMS-Admin, Brokerage Transporter Management System, and Armada Web (Internal Tools) on the frontend side.
- Successfully refactored and revitalized the invoice feature, improving maintainability and adaptability to future changes.
- Spearheaded major tasks such as invoice handling, trial feature implementation on NFT, live and history vehicle tracing for transporters, and PBI (Panthera Biru Indonesia) partnership registration, leading to the conversion of non-PBI transporters into PBI partners.
- Championed code quality and testing by writing numerous unit tests using Jest and React Testing Library, ensuring reliable, efficient, and bug-free software solutions

SOFTWARE ENGINEER - PT. XAPIENS TEKNOLOGI (YOGYAKARTA, INDONESIA)
MARCH 2021 - APRIL 2022

- Developed XSwift, a massive manage service product for internal and external clients from scratch as a web front-end developer using React.JS
- Consistently achieved sprint goals without any dragging backlog
- Deployed web apps in development, staging, hotfix, and production to Rancher
- Actively participated in sprint review, sprint retrospective, sprint grooming, and sprint planning meetings
- Thoroughly documented code to ensure easy maintenance and understanding by other developers
- Wrote several unit tests using Jest, Enzyme, and React Testing Library to ensure product reliability and robustness
- Used GIT as version control with Microsoft Azure for development team collaboration

IT ASSOCIATE CONSULTANT - PT GAMATECHNO INDONESIA (YOGYAKARTA, INDONESIA)
DECEMBER 2019 - JUNE 2020

- Assisted the production team in making the master plan and blueprint such as e-Government Interoperability Framework (e-GIF), SOP ICT, e-Government Masterplan, ICT Masterplan, and Backbone Detail Engineering Design.
- Helped the survey team gather data related to the requirements of the master plan in the Regional Government.
- Held presentations for clients to make the project easily understandable so they can work together much more comfortable with us.
- Assisted the marketing team in preparing the Budget Plan or Rencana Anggaran Belanja (RAB) and also the Terms of Reference or Kerangka Acuan Kerja (KAK) for clients.
- Supported the marketing team in using tools for Email and Whatsapp Marketing.
- Helped the division as online marketing when organizing Gamatechno's Online Sharing Session event.

SOCIAL MEDIA ANALYST - KAMPUNG CREATIVE (YOGYAKARTA, INDONESIA)
NOVEMBER 2018 - DECEMBER 2019

- Gathered social media data according to the client's social media using 3rd party's applications such as Social Sprout.
- Analyzed insight data gave by social media using a software tool such as Microsoft Power BI.
- Provided the business client with presentable and easy to understand data. So the client will get benefits. Such as:
  - What type of content they needed to post.
  - What is the best time to post the draft.
  - Which hashtags that will make the best interaction with customers.

PROJECTS

XSWIFT.XAPIENS.ID - FRONT-END DEV
Made a SaaS product for PT. Xapiens Teknologi from scratch using CRA (Create React Apps) as SPA framework based on JavaScript. It has a lot of features including managed services, dashboard, report etc.

T-MANAGE.NETLIFY.APP - FRONT-END DEV
Built and deployed a task management app with React.JS and Redux. API built with Node.JS, Postgres and Apollo GraphQL.

WEDDING-RISKA-WEBSITE.VERCEL.APP - FRONT-END DEV
Built and deployed a wedding website with Next.JS and Emotion.JS for CSS (styled-component).

RICOPENI.VERCEL.APP - FULL-STACK DEV
Built and deployed a wedding website with Next.JS and Emotion.JS for CSS (styled-component) and it also has message with custom API using Node.JS and MongoDB.

WEDDING-EDEL-FARIS-NEW.VERCEL.APP - FULL-STACK DEV
Built and deployed a wedding website with Next.JS and Emotion.JS for CSS (styled-component) and it also has message with custom API using Node.JS and MongoDB.

WEDDING-DODE-MIRAH.VERCEL.APP - FULL-STACK DEV
Built and deployed a wedding website with Next.JS and Emotion.JS for CSS (styled-component) and it also has message with custom API using Node.JS and MongoDB.

DEVCONNECTOR-FARISADLIN.HEROKUAPP.COM - FULL-STACK DEV
Built and deployed a social network with Node.js, Express, React,JS, Redux & MongoDB (MERN) Stack.

BEACHRESORT-FARISADLIN.NETLIFY.APP - FULL-STACK DEV
Made a beach resort hotel web app with ReactJS as a framework with Context API within the library. The app using Netlify as its hosting and Contentful as the API platform. The app also has a responsive design that can be accessed throughout any devices.

HOSTINGKITE.NETLIFY.APP - FRONT-END DEV
Made a landing page for a hosting web site with ReactJS as a framework with React Hooks. Used Figma as both wireframe and mockup tool and fetched data using API built with Contentful. The app also using Netlify as its hosting. The website also has a responsive design that can be accessed through any device.

FARISADLIN.COM - FRONT-END DEV
Made a personal portfolio website using Next.JS, GraphQL, Node.JS and Strapi.JS as a framework. The website also has a responsive design.

SKILLS

PROGRAMMING LANGUAGES
JavaScript (proficient), TypeScript (proficient), HTML/CSS3 (proficient), Kotlin (basic), CI/CD (basic), PostgreSQL (basic), Golang (basic), Elixir (basic), Java (prior experience), Python (prior experience), PHP (prior experience), and MySQL (prior experience).

TECHNOLOGIES
ReactJS, NextJS, React Context, Redux, GatsbyJS, StrapiJS, Jest, React Testing Library, Enzyme, GraphQL, REST API, NodeJS, SASS, Tailwind CSS, Daisy UI, Bootstrap, Ant Design, Styled CSS Component, Kendo, Github, Github Actions, Azure, Rancher, Grafana, Drone, Firebase, Android Studio, Wordpress, Slack, Microsoft Teams, Jira, Confluence, Trello, Figma and Adobe Design.

SPOKEN LANGUAGES
Bahasa Indonesia (native), English (fluent).

INVOLVEMENT

HEAD OF SOCIAL EVENT "BAKTI SOSIAL PKJ 2018"
Lead the community to contribute to creating a social event in the form of exciting applicative business games and donations in the form of funds and goods for Al-Dzikro Orphanage Foundation at Imogiri, Bantul.

FOUNDER OF STANDUP COMEDY UGM
Universitas Gadjah Mada's standup comedy was discovered in 2011. This community was established when Indonesian standup comedy, especially in Jogja, began crowded. After the Yogyakarta State University (UNY) standup comedy was created, Universitas Gadjah Mada soon found a standup comedy. This community is still running until now.
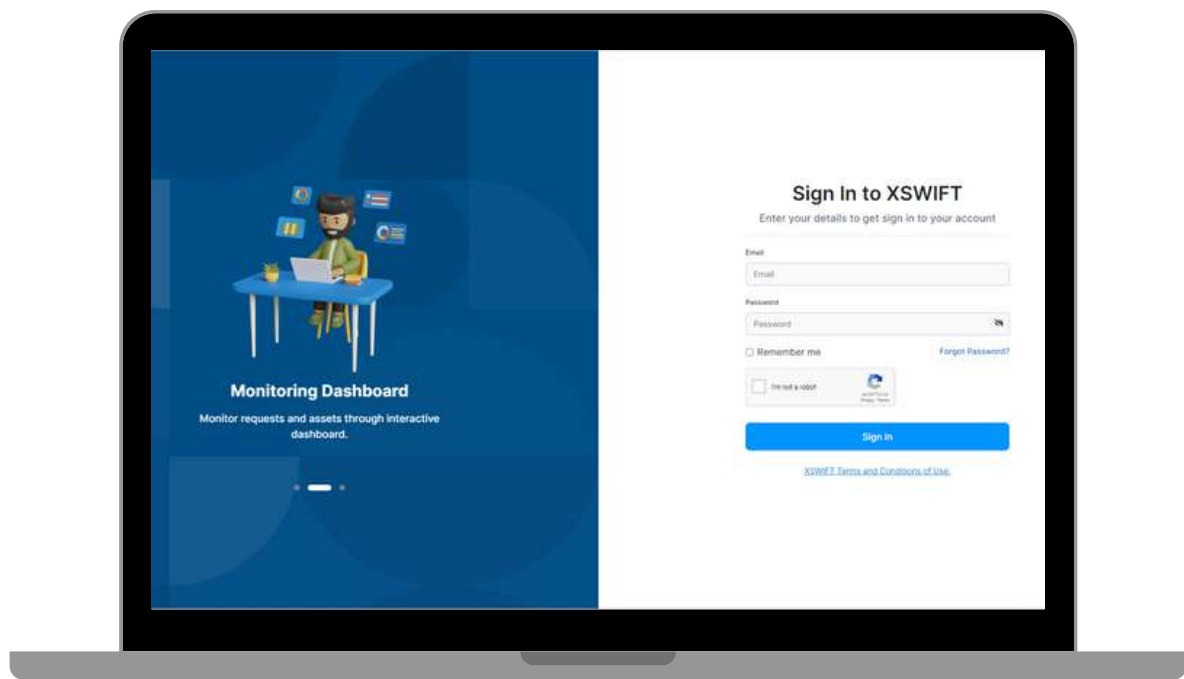

WORK SAMPLES

XSWIFT (MANAGED SERVICES WEB APPLICATION)

Made a SaaS product for PT. Xapiens Teknologi from scratch using CRA (Create React Apps) as SPA framework based on JavaScript. It has a lot of features including managed services, dashboard, report etc.
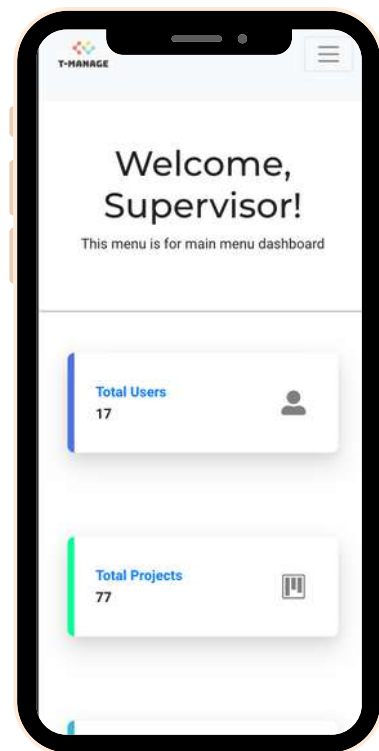

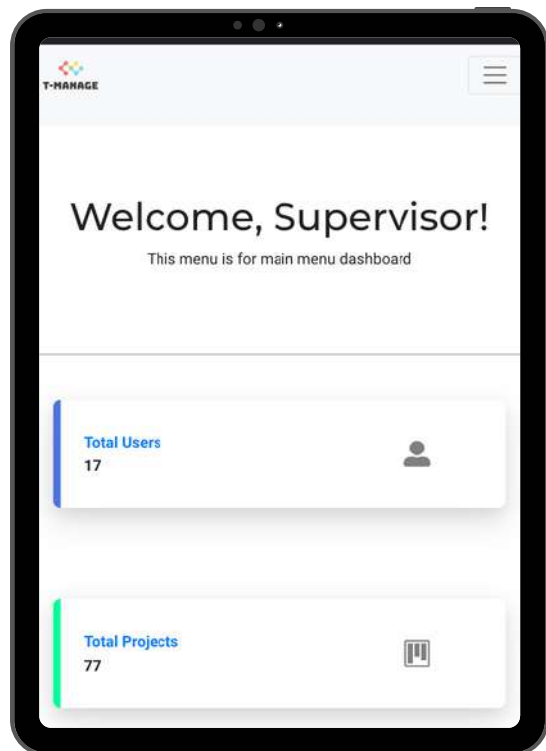

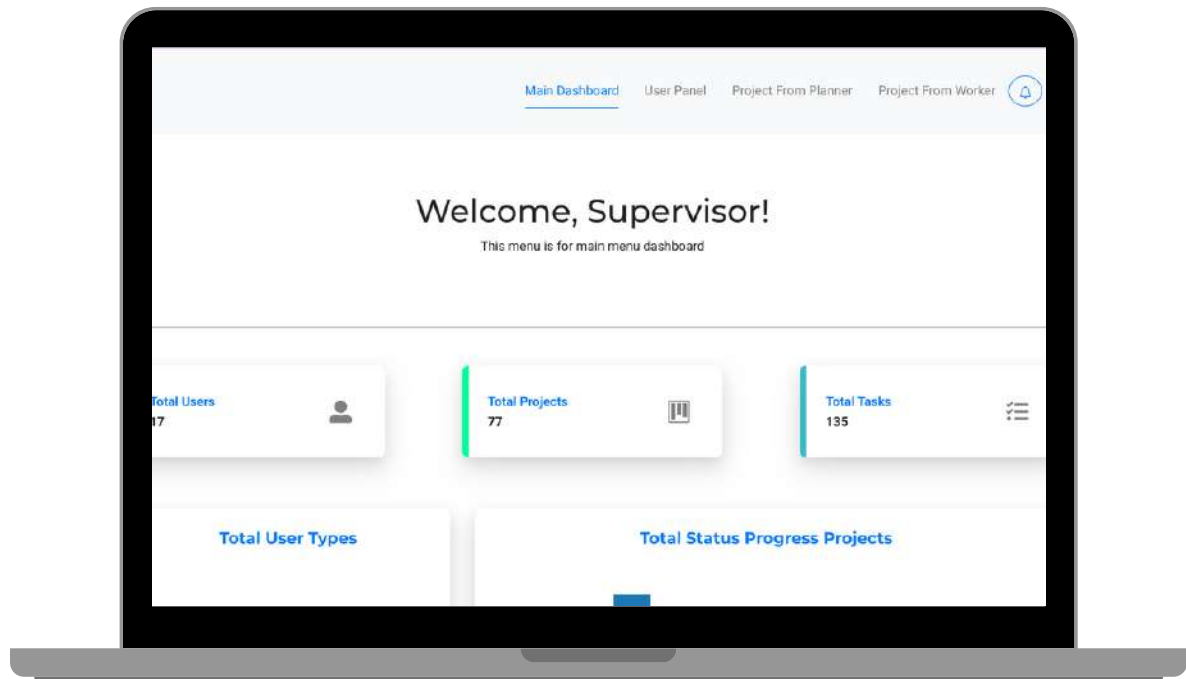

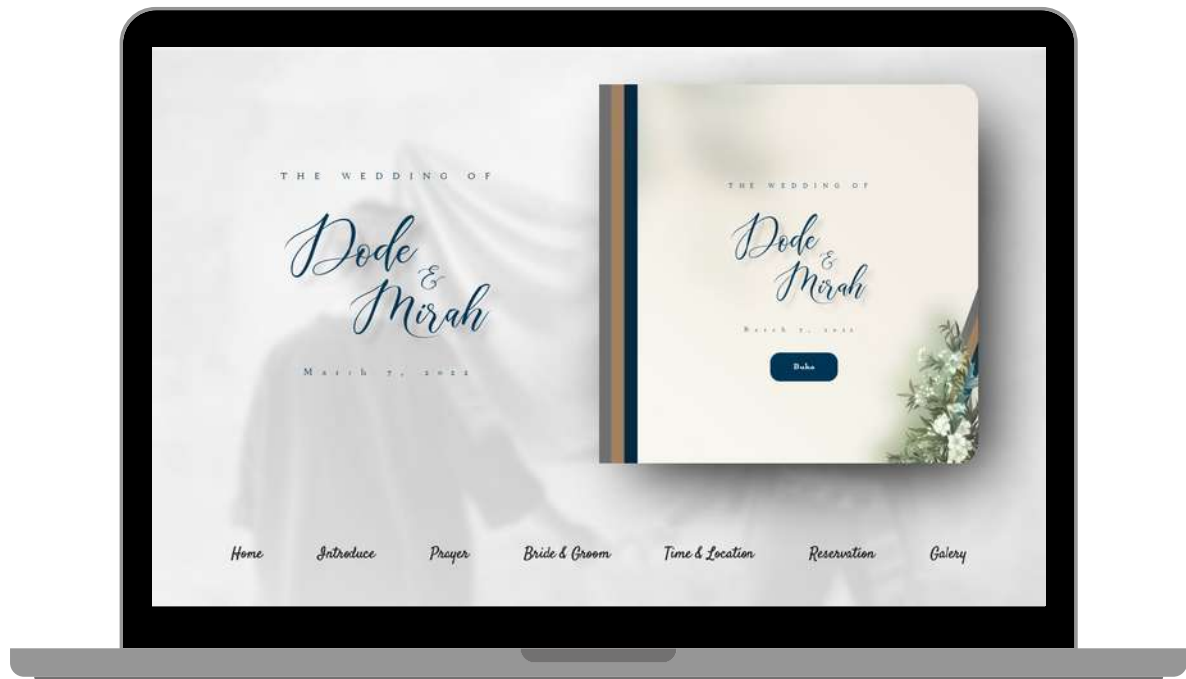

Link for the website:
https://xswift.xapiens.id/

T-MANAGE (TASK MANAGEMENT APP)

Built and deployed a task management app with React.JS and Redux. API built with Node.JS, Postgres and Apollo GraphQL.

Link for the website:
https://t-manage.netlify.app/

WEDDING WEBSITE WITH NEXT.JS (RISKA INTAN)

Built and deployed a wedding website with Next.JS and Emotion.JS for CSS (styled-component)

Link for the website:
https://wedding-riska-website.vercel.app

WEDDING WEBSITE WITH NEXT.JS (RICO PENI)

Built and deployed a wedding website with Next.JS and Emotion.JS for CSS (styled-component) and it also has message with custom API using Node.JS and MongoDB.

Link for the website:
https://ricopeni.vercel.app

WEDDING WEBSITE WITH NEXT.JS (EDEL FARIS)

Built and deployed a wedding website with Next.JS and Emotion.JS for CSS (styled-component) and it also has message with custom API using Node.JS and MongoDB.

Link for the website:
https://wedding-edel-faris-new.vercel.app

WEDDING WEBSITE WITH NEXT.JS (DODE MIRAH)

Built and deployed a wedding website with Next.JS and Emotion.JS for CSS (styled-component) and it also has message with custom API using Node.JS and MongoDB.

Link for the website:
https://wedding-dode-mirah.vercel.app

DEVCONNECTOR

Built and deployed a social network with Node.js, Express, React,JS, Redux & MongoDB (MERN) Stack.

Link for the web app:
https://devconnector-farisadlin.herokuapp.com/
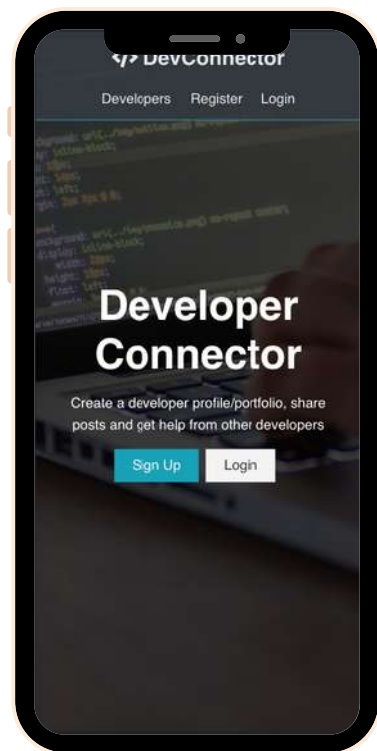

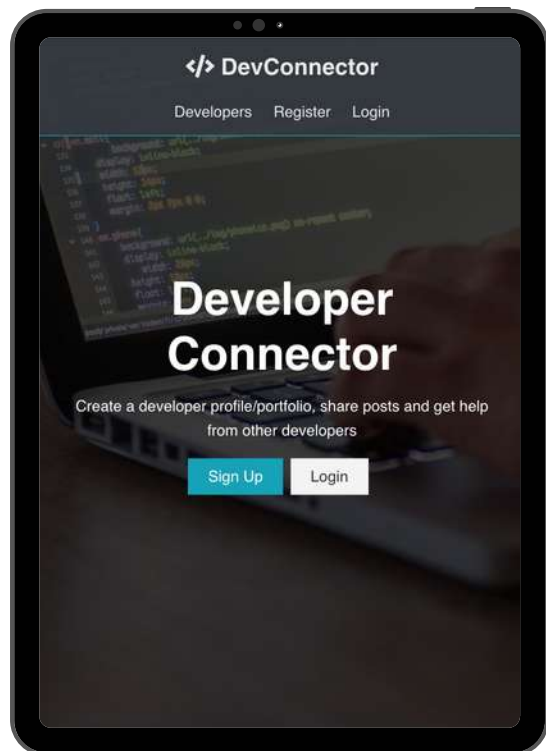

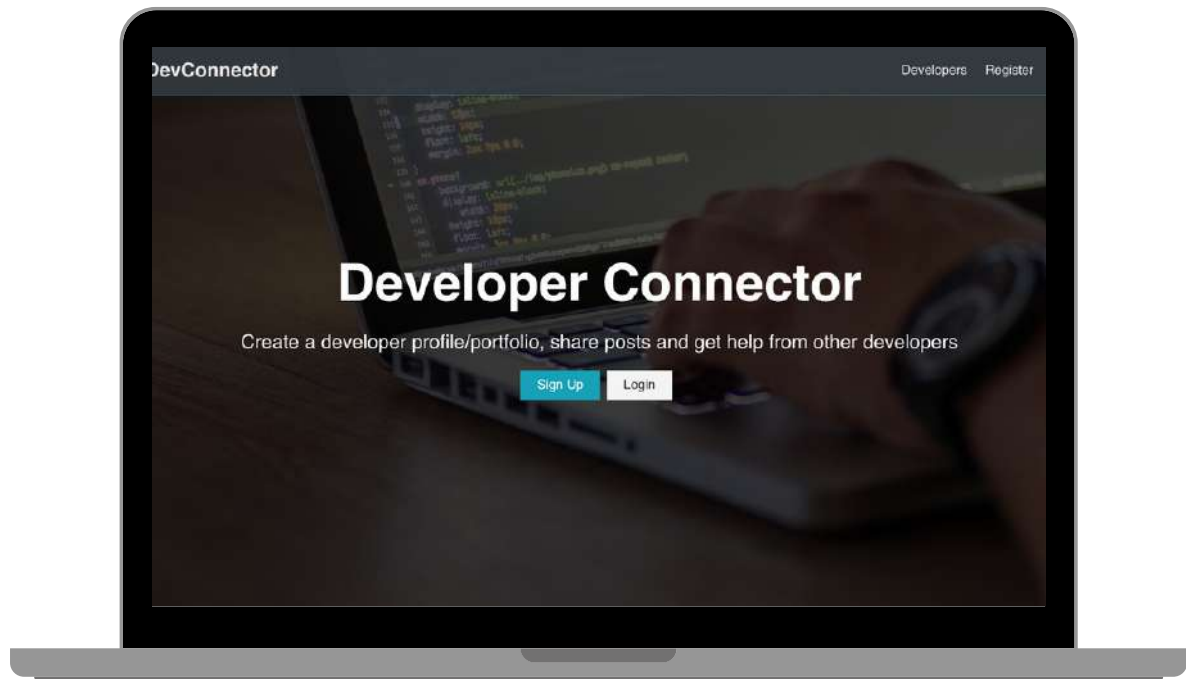

BEACH RESORT

Made a beach resort hotel web app with ReactJS as a framework with Context API within the library. The app using Netlify as its hosting and Contentful as the API platform. The app also has a responsive design that can be accessed throughout any device.

Link for the web app:
https://beachresort-farisadlin.netlify.app/
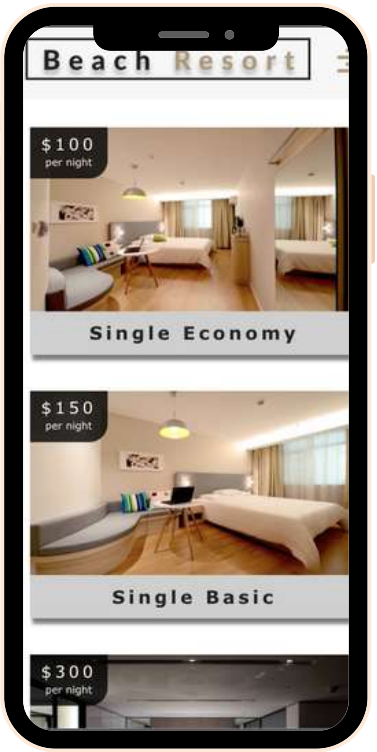

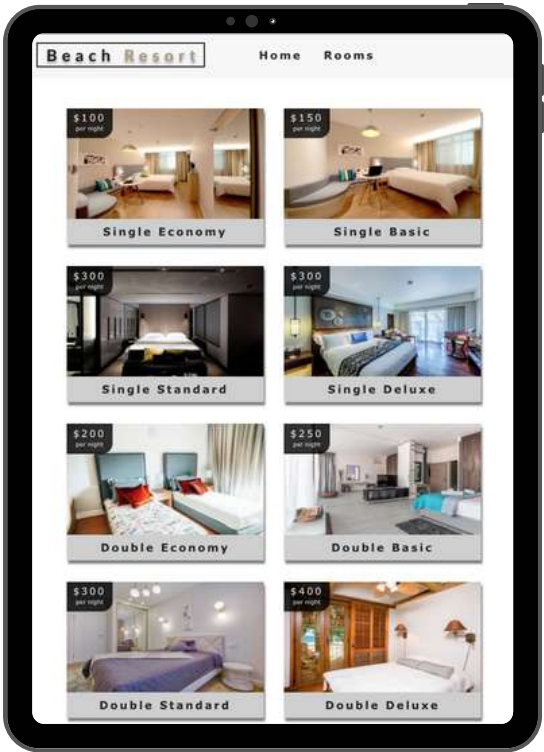

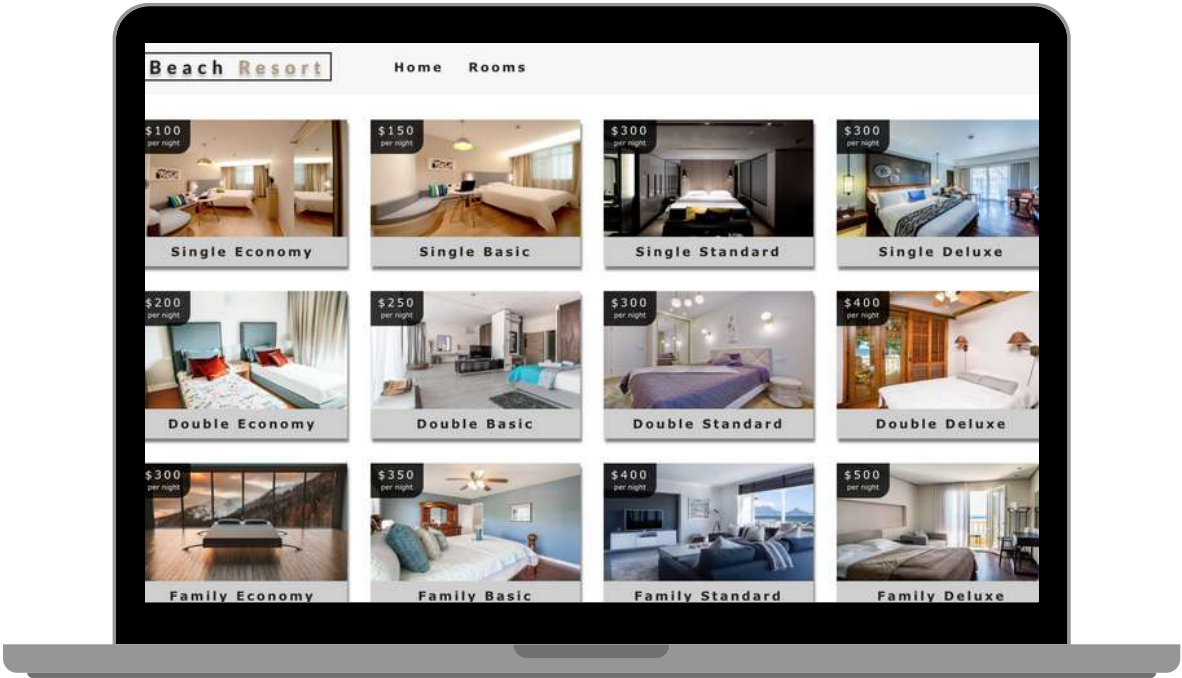

HOSTING KITE

Made a landing page for a hosting web site with ReactJS as a framework with React Hooks. Used Figma as both wireframe and mockup tool and fetched data using API built with Contentful. The app also using Netlify as its hosting. The website also has a responsive design that can be accessed through any device.
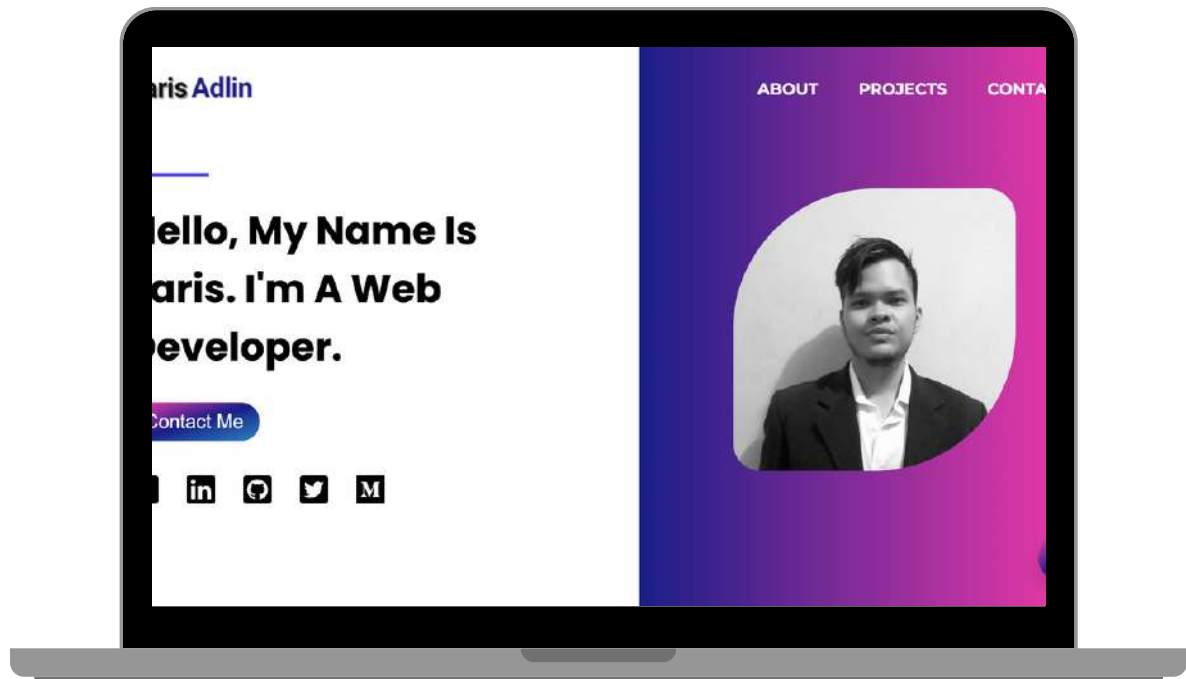

Link for the web app:
https://hostingkite.netlify.app/

PERSONAL WEBSITE WITH NEXT.JS

Built and deployed a personal website with Next.JS and only with SASS (No CSS Framework).
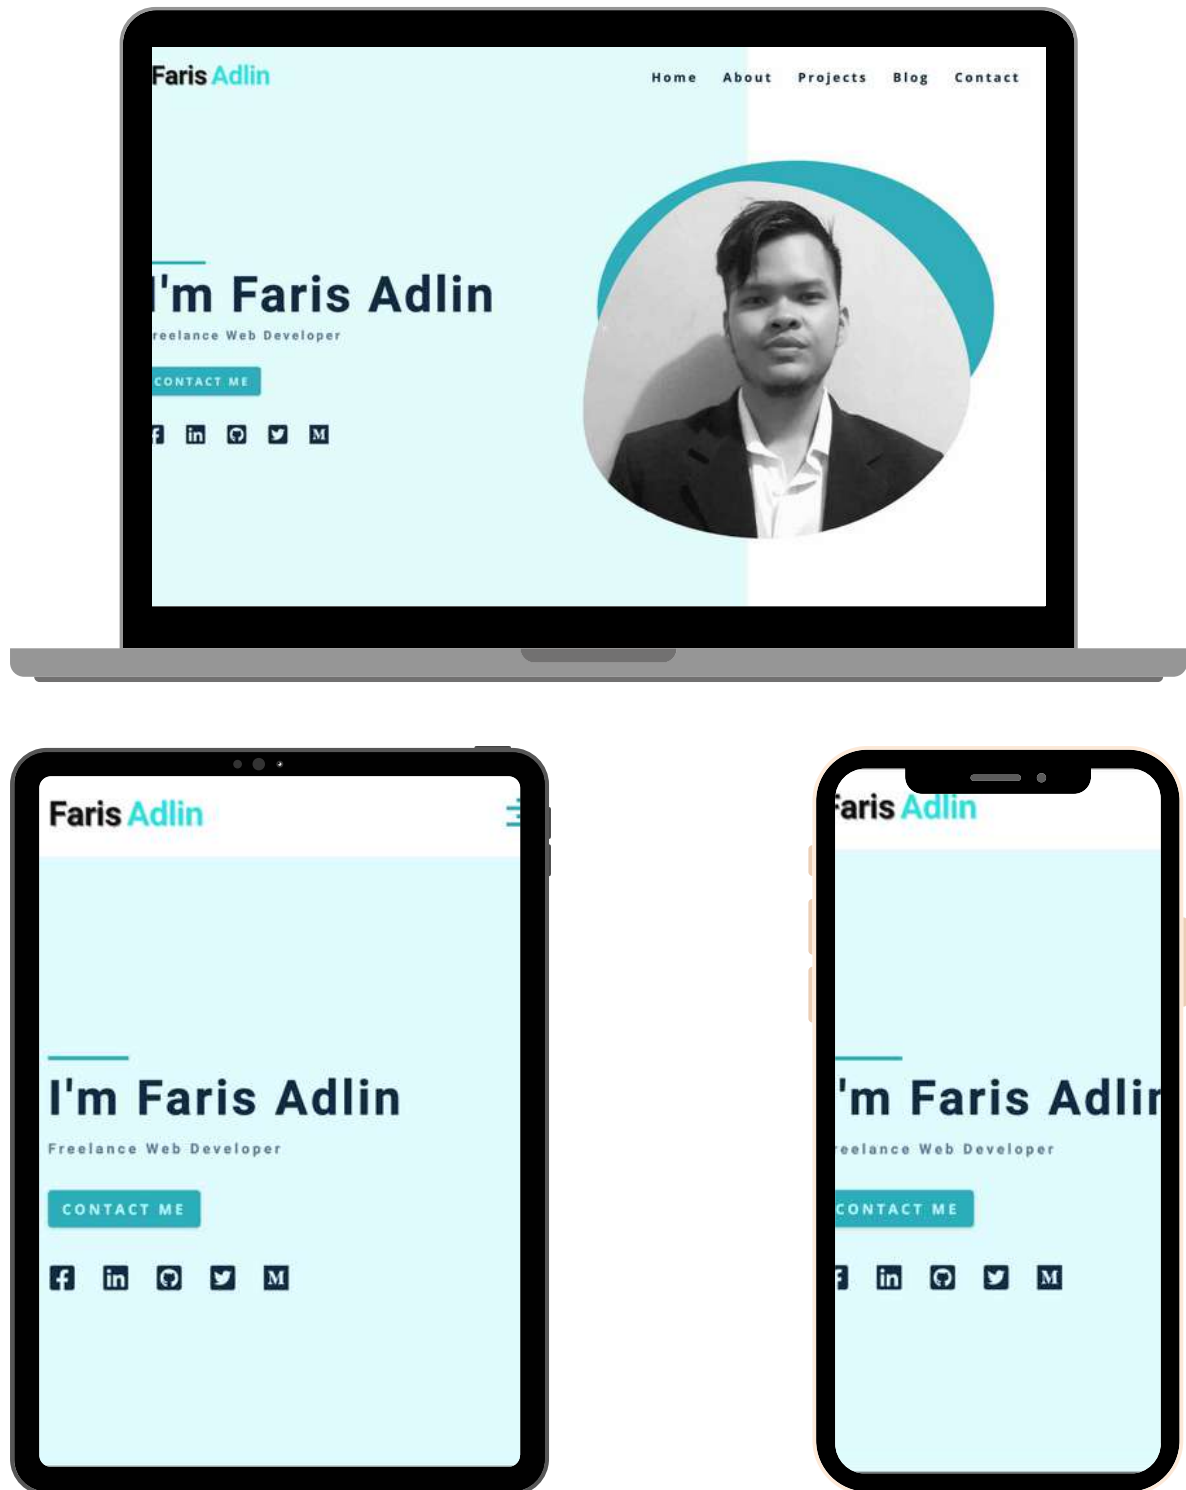

Link for the website:
https://farisadlin.com/
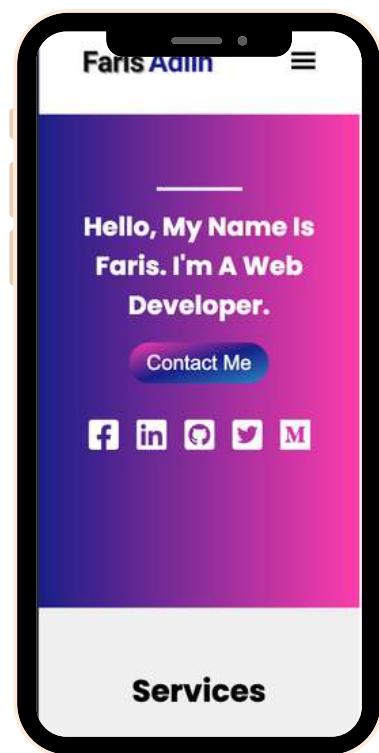

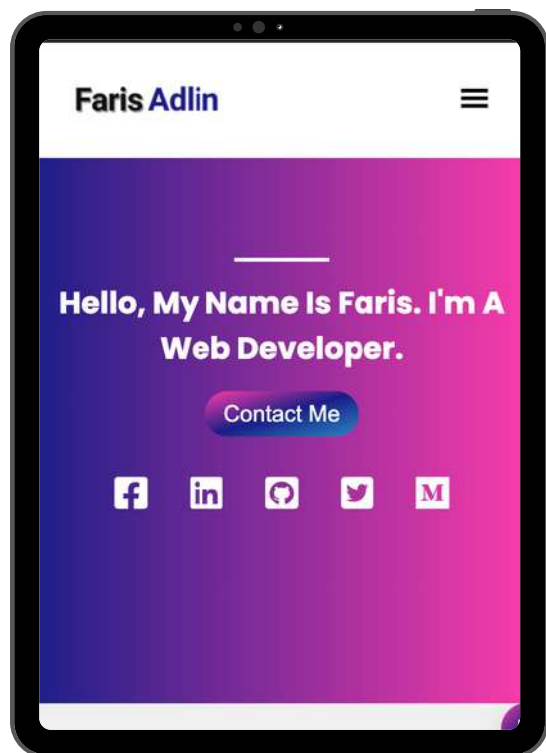

PERSONAL WEBSITE

Made a personal portfolio website using GatsbyJS, GraphQL, Node.JS and Strapi.JS as a framework. The website also has a responsive design.
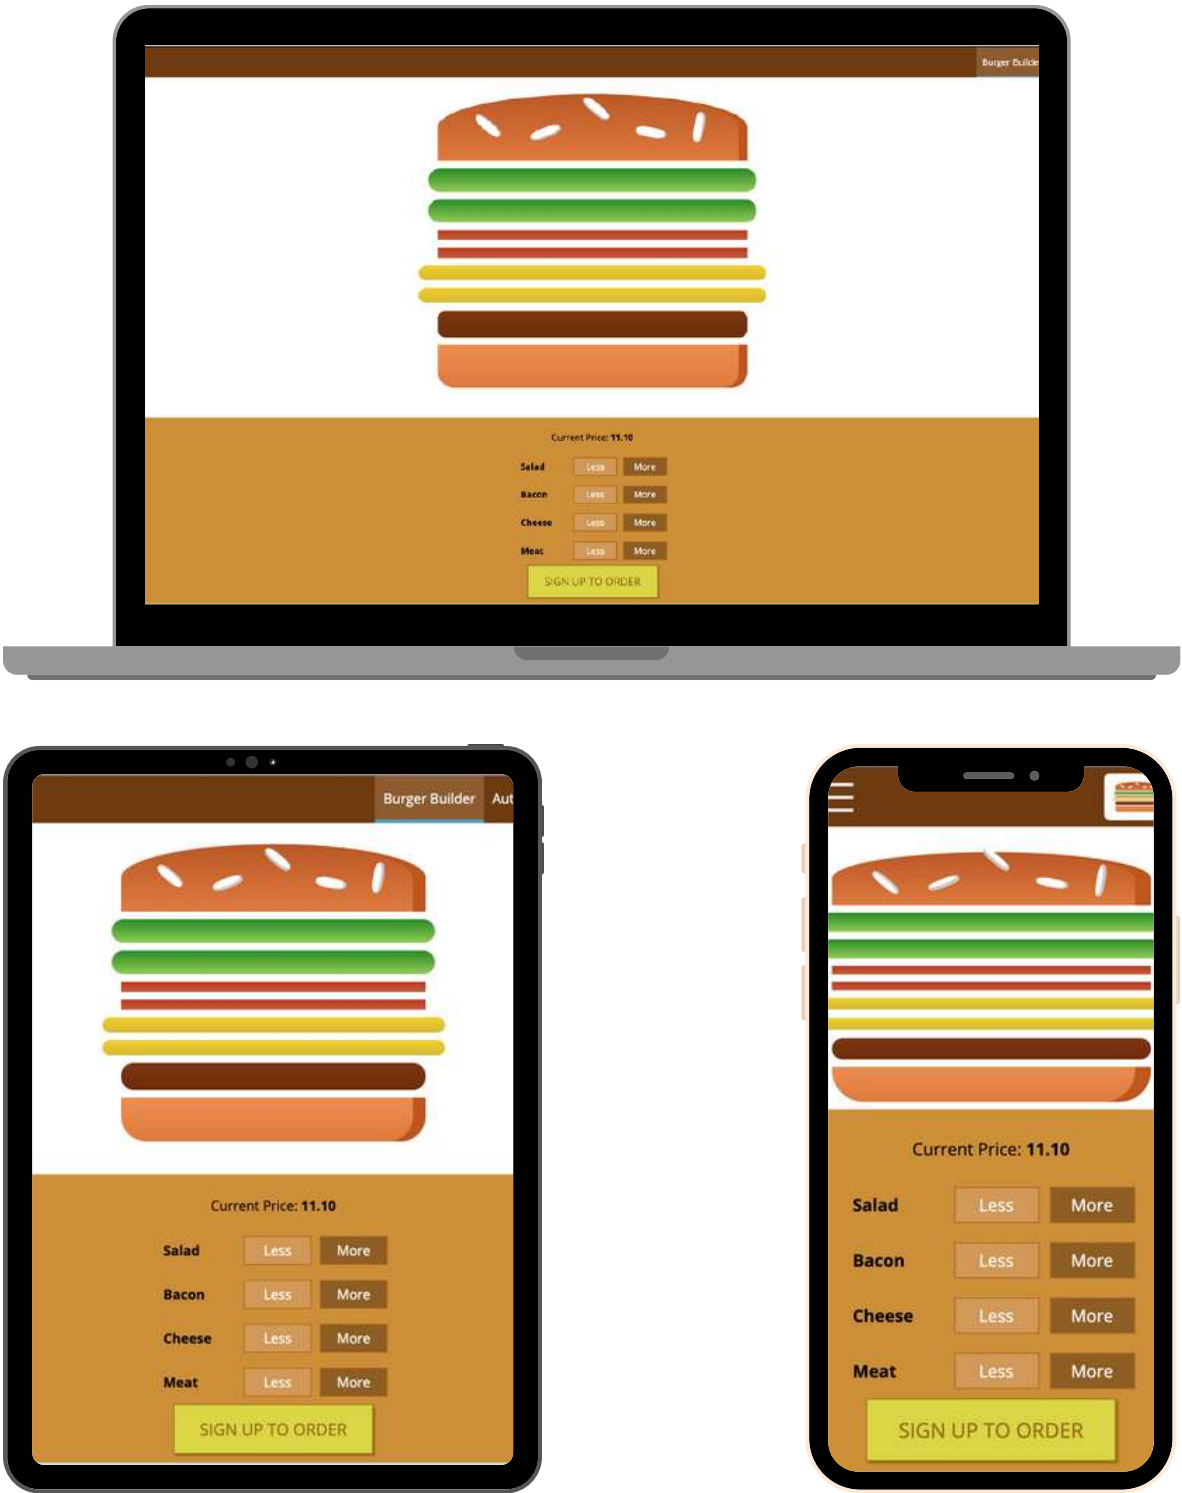

Link for the website:
http://faris-portofolio.netlify.app/

BURGER WEB APP

Made a burger web app using ReactJS as a framework with many libraries, including React Hooks, React Redux, React Router, and Axios. The app using Firebase as a realtime database. The app also has a responsive design that can be accessed through any device.
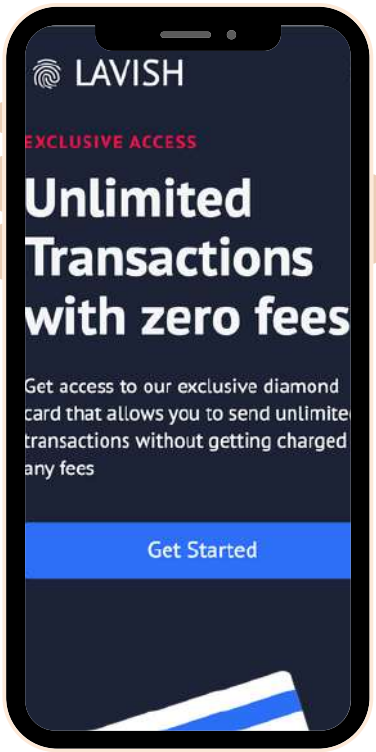

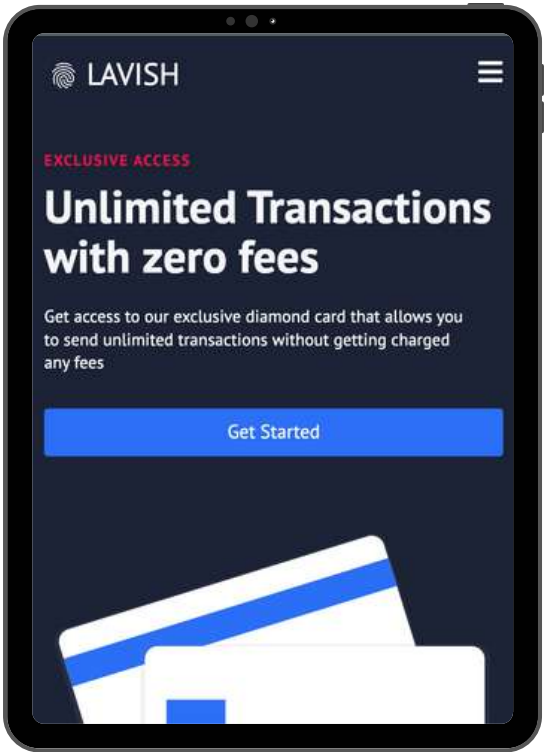

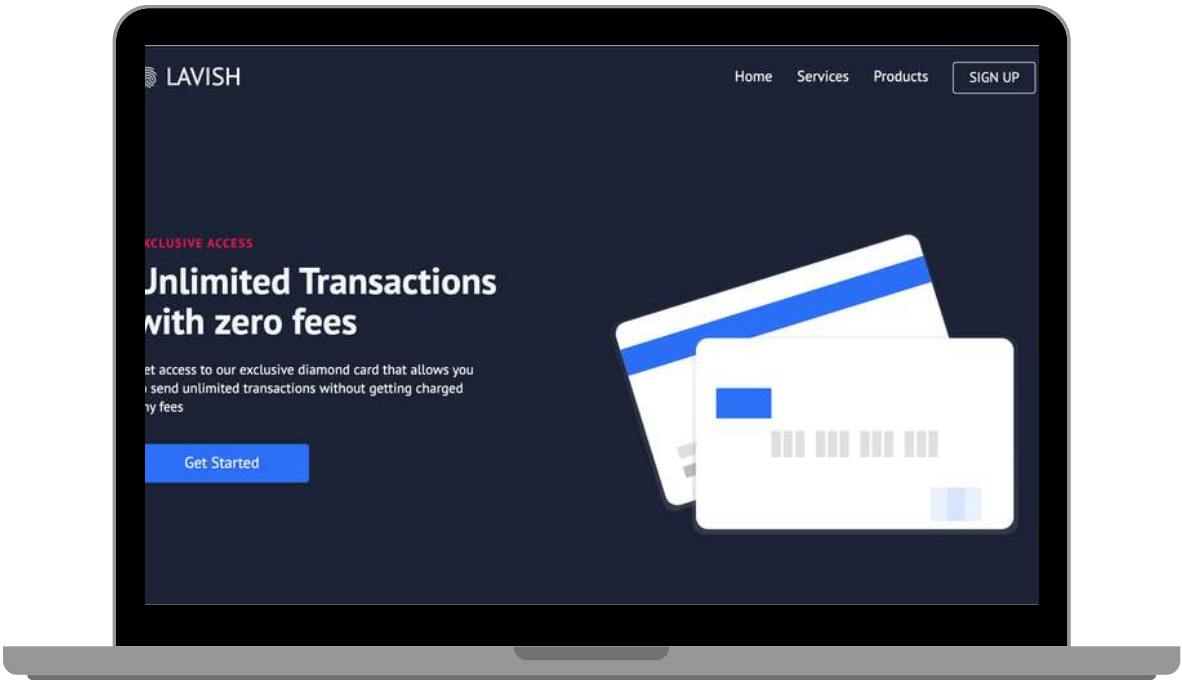

Link for the web app:
https://react-test-app-db03b.firebaseapp.com/

COMPANY PROFILE WEBSITE

Made a company profile website using ReactJS as a framework with React Hooks and React Router. The website also has a responsive design that can be accessed through any device.

Link for the website:
https://companyprofile-farisadlin.netlify.app/

PROGRAMMING IS NEVER ENDING PROCESS.

I'M LOOKING FOR CHALLENGING JOB EXPERIENCES TO SOLVES PROBLEM AND IMPROVING HUMAN LIFE WITH DIGITAL PRODUCTS
